In Champion Thursday and Friday.

Champion Defeats Crack Blackie Team

The Champion senior baseball team journeyed to Blackie on Monday May 28th to play a return game. Champion came out on the long end of the 9-3 score. Heavy hitting by Jack Kulpas and Phil Bastin and perfect fielding by Dick Latiff was a feature of the game. V. Ferguson on mound for the locals had the Blackie crew well in hand throughout the game. Much credit is due the Champion team as Blackie was entered in the provincial playdowns for the 1933 season. Batteries—V. Ferguson and G. Fox, Blackie—M. Steer, Baker, Walker, Woolridge.

Hits and Runs, Champion: F. Bauman, 14, P. Bastin, 20, J. Kulpas, 31, P. Steves, 10, M. Latiff, 21, M. Hamilton, 21, A. Anderson, 23, G. Fox, 11, V. Ferguson, 12. There were only 5 errors, 2 to Champion and 3 to Blackie. P. Bastin reserved the best hit of the game a 3 base hit in the 6th inning with the bases loaded and thus put the game on ice.

High School Team Loses to Vulcan

With a lot of tough luck and tough breaks, the Champion high school ball team met defeat by a 15-0 score on Monday May 28th at Vulcan. Two casualties, P. Bastin and R. McCullough, in the 1st inning took the pep out of the boys. The boys did not play their usual stellar brand of baseball. R. Latiff finished on the mound for Champion and had the Vulcan boys swinging and jumping while at bat. Let's hope Dick can control the iron arm of his.

Another league game will be played on Friday June 1st against Barons, on the Champion diamond. Come out and give the boys a hand.

Champion Seniors Keep Up Their Record

Champion baseball team defeated Stavelly by 6-3 Wednesday night in a 7 inning game. The game was not of the best calibre because of the heavy wind and dust that was blowing. A small crowd attended the game. Champion—Ferguson and Watts. Stavelly—Haynes and Chilton. Iron arm Haynes is still in the box and looks like he will be able to win plenty of ball games yet.

Crop Report

Crops in this district are suffering severely from lack of moisture. A few fields are in the shot blade and are in dire need of rain. The grasshopper menace is causing farmers grave concern. The municipal ball station is being operated at full force and daily a large number of farmers are in for bait. Large numbers of hoppers are reported in the north and west of the district. Summerfallowing is practically completed.

A quiet wedding was solemnized in Spokane, Wash., on Saturday, April 28th, when Miss Belle McFall, and Arthur Larsen of Priest River, Idaho, were united in marriage. Miss McFall was formerly a member of the Champion school staff.

Local & General

Don't forget the Saturday night dance this week. Come and enjoy yourself.

Mr. and Mrs. C. Luchia were Calgary visitors on Wednesday. E. D. Matlock was a Vulcan visitor on Thursday.

Mr. and Mrs. Herb. Williams and family are on an extended tour of Eastern Canada.

C. Luchia and C. Galbraith of Nanton are leaving on Saturday for a two weeks tour of coast points.

Mr. and Mrs. A. Bushfield of Calgary were the guests of Mr. and Mrs. John Cook for a few days last week.

Mr. and Mrs. I. Ditto were Stavelly visitors on Sunday.

B. Hummel and family, accompanied by Mrs. Campbell and Buckley, spent last Sunday at the home of Mr. and Mrs. A.C. Little of Stavelly.

F. Watts and family, accompanied by Miss Watts of Vulcan, motored to Banbury over the week end to visit with Mr. Watts' father, who is seriously ill.

Mrs. Cook, Mrs. James, Miss Jean Cook and Mrs. Brown and daughter of Gleichen, were guests at the home of Mr. and Mrs. J. D. Henderson Friday and Saturday of last week.

Miss Clarkson, Miss Cameron and Miss Cifgard attended the stampede held at Hussar on Thursday, May 24th.

Mr. and Mrs. Alex McDougall and daughter Morag, Mr. and Mrs. Geo. Bailey, Mr. and Mrs. Bazzath were visitors at the Pines of Wales ranch on Sunday.

Service will be held at Yutwood school Thursday May 31st at 8:30 p.m. Rev. Peter Dawson officiating.

Mrs. J. Caetator is visiting relatives in Nanton.

The Grand Chapter Session of the O.E.S. meets in Lethbridge June 5.

The Junior C.G.I.T. girls met at the home of Mrs. Hummel on Friday afternoon. Mrs. M. G. Clover instructed the girls in the art of crocheting tams.

R. Maxwell's barber shop was in the hands of the painter last week, when the interior was completely redecorated.

Many buildings have received a coat of paint this week. F. Clapp's harness shop and J. Fong's restaurant both presenting a very pleasing appearance.

Mr. and Mrs. R. I. Baker have as their guest this week, Mrs. Stubbs of Calgary.

Gay Dow, who is a patient in the Vulcan hospital, is progressing favorably.

Mr. and Mrs. W.F. Bazzath attended the graduation exercises for the nurses of the Holy Cross hospital, held in Calgary last week. Miss Jenny Ulfsten was among the graduates.

Ted Davis spent the holiday week end with Mrs. Davis and daughter, who are visiting relatives in McGrath.

Mr. and Mrs. Gerald Groves expect to leave this week for the Peace River country.

Mr. and Mrs. Clapp and family spent the 24th in High River.

Recent word received in town indicated that Mr. and Mrs. Harold Poirier were receiving congratulations on the birth of a son.

Mrs. Gibson of Calgary, was a guest at the home of Mrs. Gottenberg, last week.

Obstacles To International Agreement

Obstacles to international agreement are many and various; so many, so various as to becloud the vision of the conferees and defeat the ends sought. Particularly is this true when a complex of nations is represented round the conference table. Despite the good intentions of conferees, the high sentiments they express and the noble purposes they proclaim, invariably dissonance interrupts the even tenor of the proceedings, divergent points of view preclude themselves and, with each interruption and each protraction, practical agreement becomes the more remote.

The conflict of opinion appears less with regard to the general objective sought, as with regard to the methods by which that objective is to be reached. In the ultimate analysis, political rather than practical issues prove the stumbling block.

These thoughts are occasioned by the succession of disasters which has befallen world conferences held for perfectly laudable purposes during recent months. The League of Nations itself, perhaps the greatest agency for world co-operation yet devised, has suffered considerable loss of prestige through recurrent manifestations of local interest, local jealousy, pride and susceptibilities. In many tracts, such as the drug traffic, in which public rather than political and national considerations are paramount, the League has been able to take decisive action and render invaluable service. But where political and national considerations are involved, directly or indirectly, its decisions have been of less unanimous acceptance. In fact, they have seldom been effective because they have been largely ignored.

In spite of the League and the large body of opinion supporting it, where matters of national egoism have been involved, the League has been involved have proved a law unto themselves, using the simple expedient of withdrawal from the League as a means of asserting their right to go their own way. Disarmament questions have brought prominently into the foreground this conflict of national viewpoints, and this insensate desire for autonomy in matters affecting the peace of the world. There can be little question that world opinion, generally, favors disarmament on a sane and sane basis. It is equally true, however, that there is sharp division of opinion as to what the basis should be and as to the methods whereby it should be undertaken. World disarmament conferences have proved futile, so far, in spite of the unanimity voiced by national spokesmen as to its desirability. All nations, it appears, are in favor of disarmament—provided the other fellow does it.

Strange as it may seem, while world conferences on the question are disheartening failures, the same can not be said with respect to understanding on the subject between particular nations. Bilateral disarmament agreements appear easy, by comparison. Where two or three nations are involved, amicable solutions come readily to hand. Britain, for example, has little difficulty in reaching understanding with Italy, Italy with France, and so on. Even with Germany amiable negotiations are possible. Yet, when Britain, Italy and France sit around a conference table with Germany, it becomes immediately impossible to focus all eyes on the same objective and on the same means of achieving that objective.

This is not to say that Germany is entirely at fault, or that the blame attaches to any particular one of the parties to the conference. It is apparently due to the complications which arise with every addition to the conference. Compromise between two nations is easy; between three or three nations it is a little more difficult, but less difficult than when four nations are involved. Perhaps then, the real solution is to be found in multiplying bilateral disarmament agreements until the whole world is involved and all the nations are committed to peace.

The same course may be found the ultimate solvent of the world's worst problem. Apparently, the London Wheat Agreement has founded on the shoals of national egoism, as that of the London Metal Agreement has virtually negated the good work accomplished in the London conference, and the United States, in reprisal, is threatening unlimited production and the dumping of its surplus on the markets of the world.

The London conference on wheat has been acclaimed as a unanimous agreement representing the first really cooperative arrangement yet reached by the nations of the world. It was not, however, a false thing, in itself. It left certain important decisions for later consideration, particularly the matter of minimum prices. Experts met at Rome to discuss prices in accordance with the terms of the agreement, only to be met by objections from the Argentine and demands from that country for an increase of 40,000,000 bushels in her quota of wheat. Having already virtually exhausted her export quota for the year as set in the London Agreement, the Argentine demanded an additional 40,000,000 which could only be given at the expense of other exporting countries, including Canada. The price conference, however, reached certain tentative conclusions which were submitted to the governments involved.

The next stage in the proceedings was the London conference on prices to amend or ratify the decisions of the Rome discussions. Here again, clash of national interests proved a handicap. Doubts have been raised whether or not price-fixing by a central body is a sound practice to adopt. In fact, British grain men have been emphatic and outspoken on the subject. The head of the London grain exchange had no hesitation in stating that the representatives of the various nations were not men who they knew very little about wheat. With warnings against price-fixing, demands for increased quotas, and threats of unlimited production, the world agreement appears in jeopardy. Obviously, the complexity of national interests is too great to handle as easily as it was in the London. Perhaps (be it repeated) the solution may be found in a series of bilateral agreements involving all interested parties.

Used Sign Language

Sign language was used by members of the Western Canada Association of the Deaf as the medium of presentation at a banquet given at the Saskatoon. A short play, given by school pupils, depicted early education of the deaf in this country. In addition, "O Canada" was rendered in the sign language.

Phones For Dinner Guests

Guests at a telephone service dinner at Grosvenor House were able to talk to friends at the other end of the dinner table by means of small seats, telephones being installed on the tables for this purpose.

Ordinary printers' ink is used in making fingerprints.

Health For Young Girls
Happiness For Tired Women

Thousands of women become tired out and run down, become thin and pale, and profound weakness makes life a burden.

The whole outlook of life is changed when the nervous, sick headache, the sleeplessness, the spells of dizziness, the weakness and discouragement, and the tired, languid feelings disappear with the use of Milburn's H. N. & P. Pills. They tone up the nerves, cleanse the blood, and bring the health back to normal again.

"Britain Of The East"

Story Of Japan's Progress And Development Reads Like Romance

Whatever may be said of the aggressiveness of Japan in the Orient, it must be acknowledged that she deserves the designation, "The Britain of the East." Never in the history of the world has any of the backward nations made such gigantic strides forward in the path of civilization as has Japan.

The story of her progress and development reads like a romance. From the very time when she reformed her government and established democratic institutions she has gone forward in the path of education and scientific progress and in industrial development at a remarkable rate. Her educational and scientific institutions are among the finest in the world. Moreover, her army and navy have reached a stage of development that is second to no other country. Hence, Japan is a nation so perfectly equipped from a technical and scientific point of view that her competition may well be feared by other nations. To make light of her industrial development shows a lack of appreciation of the remarkable progress she has made—Brantford Expressor.

DEPRESSED BY
ACUTE ACIDITY

There can surely be no doubt about the effectiveness of a remedy for acidity that can give such permanent relief. "I suffered for many years from 'At the heart' became so acute that every morning I woke up with a gnawing pain in the stomach, and at night I tried Kruschen salts, and after a few days the pain was subsided and the depression lifted like a cloud. I have taken the daily dose of Kruschen salts for over a year and have been free from acidity for about five years ago, and the pain has not returned since." (Miss E. M. H.)

Kruschen is so effective with the heart and stomach that it takes all the torment out of it, and gives the system a new lease of life. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this harmful acid from even accumulating again. After this you will experience no more misery after meals.

Canada's Metal Industry

Domination Dominates World States

President Of Mining Institute

Within 20 years Canada's metal industry has grown to such an extent that it was possible to-day for the Dominion to produce practically all the copper, most of the lead and zinc and all of the nickel needed in the Empire. R. G. Haylock, president of the Canadian Institute of mining and metallurgy, said today.

He was addressing a complimentary banquet given to him by the Four Ports Board of Trade in connection with the opening of the Associated Boards of Trade of Eastern British Columbia.

Canada dominates the world in copper, nickel, lead and zinc, said Mr. Haylock.

Mr. Haylock thought there was little likelihood of any change in the dropping for years to come. As a metal producer, the Consolidated Mining and Smelting Company of Trail, of which he is vice-president and general manager, was not concerned with the 10 per cent. tax on gold, nickel, lead, copper and zinc producers would be only too glad to pay millions in taxes on these metals if the price was 75 per cent. over the normal price of 20 years, he stated.

Japan Buying Scrap Iron

Recent Cargo From Australia Considered Valuable

Japan has been picking up scrap iron all over the world, and one of the most varied cargoes of this kind arrived the other day from Australia. There were steel rails red with rust, old sewing machines, and automobile fenders. On the top of one heap was a battered drum. Scores of old drums ranged side by side with piles of worn-out machinery, car wheels, cooking stoves, and scores of other ancient and apparently useless articles, together with hundreds of thousands of old horseshoes. Even obsolete cannon were in the cargo.

A Good Definition

Crooning? Here is a college professor's illuminating definition of it: "An exaggerated and distorted expression of emotional feeling, a kind of semi-musical noise that is emitted from the throat and attractive to some persons because it is something new. Only people of low intelligence like it." It was described thus by Jean-John Patten Marshall of Boston University College of Music.

Wants Room For Expansion

Mussolini Expresses Need For Italy To Seek Room In Africa

And Add Geographic and historic reasons were given by Mussolini in an interview with Hector Bywater, editor of the "Daily Telegraph," in Rome, for the expansion of Italian power in Africa and Asia, and the need for a strong navy.

During the interview, Mussolini said:

"Thirty provincial capitals are crowded in the east. Rome itself is near the sea. Geography is one of the immutable factors that determine the destinies of a nation."

Then he went on to say: "Geography and history both warrant us in taking Asia and Africa as objectives. We are nearer to those two continents than any of the greater western European powers. No one should mistake the meaning of our task. We are not thinking of any territorial conquest, but every-one should know that we are thinking of a natural expansion allowing us to co-operate with the nations of Africa and the Far East."

Mussolini then turned to the problems of the League of Nations and of disarmament, saying:

"The principle of the reform of the League of Nations, which is almost universally accepted, is clear. The reforms that are being considered should only be undertaken after the closing of the disarmament process, because if the process once fails, there will be no need to make any reforms. It will be enough to consider the work of the League of Nations as ended."

"It is generally considered that the conference will fail, at least as regards the most important objectives. The greatest armed powers will not disarm; those that are not armed will be in a position to arm with a more or less defensive purpose."

Paris Hotels Face Ruin

Taxes Heavy And American Tourist Business Is Falling

Instead of opening the customary new extensions as the tourist season starts, one leading Paris hotel, the greatest armed powers will not disarm; those that are not armed will be in a position to arm with a more or less defensive purpose."

Hotel managers blamed two factors for their plight. First, the average of one-third of all money taken in must be sent to the state in the form of taxes. Secondly, the American tourist business has almost evaporated.

"It thus continues for a short time more we'll have to close up, too," the director of a leading hotel in the Ettoile district declared.

Here are a few of the hotel taxes: Six per cent. of the gross room collected as a luxury tax.

Four per cent. of all room bills as a city tax.
A social insurance tax.
A tax for apprentices.
A tax for mutilated soldiers.
A tax for operation.
A property tax.
This totals from 25 to 50 per cent. of receipts.

New School Readers

Uniform Standard To Be Adopted By Four Western Provinces

A new standard of school readers has been adopted by representatives of the four western provinces to be used in the public schools. These representatives have been meeting from time to time for the past two years judging the contents of the books. The seven books in the new series are to be known as "High-roads to Reading." The books will be adopted as school readers for the fall term of 1935. All will be uniform in style and will be attractively bound and will have colored illustrations. The printing will be done in Toronto.

The fox-tail fly is a striking looking plant for the back of a large border. It is also known as the "desert candlestick" on account of its long strap-shaped leaves and tall spikes of flowers like a column or a candle.

"Blue" Spells

Radio Signals For Aviators

Ingenious Device Will Keep Flyers In Defined Limits

A device for visually interpreting signals of aeronautical radio range beacons has been developed by W. K. Jackson and L. M. Harding, radio engineers of the U.S. commerce department's aeronautics branch, according to Rex Martin, assistant director of aeronautics.

Signals, Martin explained, are received through headphones by airmen who rely upon them for guidance during periods of poor visibility.

The device features an indicator which, fitted in the instrument panel, is similar to the contrivance used for blind landings. It is open-faced and has two needles—one vertical and one horizontal. The vertical needle, Martin explained, is chief indicator when an airplane leaves the course defined by a radio beacon, this needle will move accordingly. However, he added, if the aeroplane is exactly on course, the vertical needle will remain in centre of the dial.

The horizontal indicator, the official revealed, shows the volume of received signals, which the pilots may adjust as he sees fit.

Egg Trade Responsibility

Responsibility As To Eggs Below Grade Placed On Seller

In case of dispute about property rights in eggs of graded eggs, the Canadian egg regulations are quite explicit. No case or container of eggs is considered to be property until it is upon examination by an inspector, the case is found to contain more than an average of six per cent. below grade, apart from breakage. In transactions between wholesalers, or between a wholesaler and a retailer, any complaint by the purchaser with respect to eggs below grade must be made to the seller within 36 hours of the receipt of the eggs. Thus, responsibility as to eggs below grade is upon the seller for the period of 36 hours after delivery to the buyer. After the expiration of the 36 hours the responsibility as to eggs below grade is upon the retailer in whose possession such eggs are found.

For Civil Servants

Want Temporary Employees Brought Under Civil Service Act

Representations on behalf of various classes of civil servants were made by V. C. Phelan, president of the Civil Service Federation of Canada, before the common civil service committee.

Mr. Phelan asked that 216 long temporary employees in various government departments who had been eligible for permanent appointment prior to 1927, but through negligence or some other cause were not appointed, now be brought under the Civil Service Act.

Public School Education Public school education in Canada costs \$63.63 a year per pupil, according to reports published by the Canadian government. The report shows the total expenditure is about \$185,000,000 a year. In 1932 there were 86,216 teachers, 2,568,116 pupils in the Canadian school system.

Increased Payrolls

Movement In British Columbia To Improve Working Conditions

Payrolls in British Columbia have been increased by approximately \$200,000 per month since the provincial department of labor started its drive through the board of industrial relations and other agencies to improve working conditions in the provinces. Hon. George S. Pearson, minister of labor, has estimated.

In the sawmill industry alone, the increase was about \$85,000 a month, he said. The aim of this board so far, Mr. Pearson said, had been to set minimum wage scales as high as could be paid by the industries affected, but not so high they would be forced to stop operations. As conditions improved within a particular occupation, the level could be raised if necessary.

Trying To Find Secret

Manufacturers Seek Buddhist Method Of Producing Stainless Steel

To study four columns which have stood for 2,000 years without showing a sign of decay or rust, a body of European steel manufacturers are visiting India. They hope to learn how people of those days produced stainless steel. The columns were erected by Ashoka, the great Buddhist emperor, in four districts of his Indian Empire. Each stands on a high rock and is inscribed with the laws of Ashoka's reign. Through the centuries earthquakes have not shaken them and storms have not rusted them. The secret of their making is believed to rest with descendants of the makers, and the steel manufacturers hope to learn this.

Soybeans Profitable

The Farmers' Advocate says many livestock men, and dairymen particularly, are finding soybeans a profitable crop to grow. The beans add to the protein content of the meat and fat and for hay they are both productive and palatable.

CHILDREN'S CONSTIPATION Ended!

Mr. H. T. Rosemont, Athens, Ga., writes: "My baby boy was troubled with constipation. I gave him Dr. Williams' Pink Pills for Pale People. Before I had given him half the bottle, his bowels were regular. By relieving constipation, baby's health was restored. He is now a healthy, happy child. I have used and perfectly safe for all little kids from 1 year old to 16 years of age. Second age, 25c package.

Village of Champion, notice is hereby
given that all ashes, refuse etc., must
be cleaned up and hauled away, be-
fore the 15th day of May, 1924.
By order of The Village Council.

Keeping Up Quality

The reputation of Canadian wheat on the
markets of the world is due to the efforts
western farmers have made to keep up the
quality of their production.

And the reputation of United Grain Growers
is similarly based on unswerving efforts to keep
up the quality of its service to farmers in
handling their grain and furnishing them with
farm supplies.

Deliver your grain to

C.G.I.T. Camp

Rev. Peter Dawson, as a rep-
resentative of the local C.G.I.T.,
met with leaders of the various
clubs at Vulcan on Saturday,
when camp arrangements for
the summer were discussed. It
was decided to hold camp at
Arrowwood from July 11th to
July 10th. Any girl between
the age of twelve and eighteen
may attend. The fee for each
girl will be \$4.00, \$1.00 to be
enclosed with registration form.
Visitor's day will be held Sun-
day afternoon of the camp
week, with church service at
7 p.m. The camp staff will in-
clude Mrs. Dupue and Mrs.
Gatenby.

Rex Caldwell wishes to ex-
tend his thanks to his many
friends for kindnesses shown
while in the hospital, also for
the beautiful bouquets of flowers.

Local & General

Miss Willies was a tea hostess
on Tuesday.

Wayne Anderson was a busi-
ness visitor in points in B. C.
this week.

A much wanted man was
captured at MacLeod, when
Constable Brailford arrested
John McLean, alias J. E. Allen.
The culprit visited Champion
on Saturday and received goods
and money on counterfeit grain
tickets.

Well founded reports reached
Calgary Tuesday that the dis-
ease condition at Stobart Lake,
where hundreds of ducks died
last year, is worse now than at
any time last season. Several
ducks and gulls have died with-
in the last few days from the
mysterious disease. The death
of the gulls is causing consid-
erable alarm due to the fact that
these birds are so valuable to
farmers.
